

MACK GRANITE

Parked DPF regen procedure:

1. Make sure the park brake is applied
2. Make sure the cruise control switch is off
3. Make sure that the transmission is in neutral
4. Scroll down to the E.A.T.S STATUS screen using the selector on the right-hand side of the steering wheel

5. Push the select button

6. This drop-down menu should appear

7. Scroll down to request regen
8. Push the select button again
9. The truck rpm should elevate and a regen should start. Note: if the truck does not need a parked regen you will not be able to perform one.

***** If the service brake is pressed, park brake is release or cruise control switch is enabled during a parked regen the process will stop and need to be started over again*****
